**Jakarta – Saint-Sauveur, QC**

Jakarta has developed a complete AI-driven 3D mapping solution, from data acquisition to visualization. At the heart of the infrastructure, their data processing platform automatically creates a high-definition Digital Twin of the world as seen from the street. More advanced processing on their 3D data allows classification and data extraction (road, building, vegetation, road signs, pole network). Their Smart Digital Twin goes beyond exploring the territory in 3D, it allows better asset management, also used in design and planning. Immersion, change detection, inventory and status analysis are now more accessible for engineers, GIS and land managers as well as infrastructure and utilities managers.

**Lime Health – Saint-Augustin-de-Desmaures, QC**
